Expert Insights: AI Takes Center Stage in Incident Response

Organizations are constantly battling sophisticated attacks, making an efficient and effective incident response process more elusive yet ever-more critical. But what if new and emerging technology could not only help organizations react to these incidents but also proactively strengthen their defenses?

How to Think About AI: A Conversation with Richard Susskind

We were delighted to host Professor Richard Susskind last week in Basel, Switzerland, for a compelling discussion on the transformative impact of AI where he discussed insights from his newly-released book, *How to Think About AI: A Guide for the Perplexed*. The discussion featured thoughtful, detailed perspectives on the future of law, business, and society.

Thank you for reading this month's **Data Matters** newsletter. We hope you found it valuable!
