Creating Effective, Strategic Partnerships for IP Protection

AI can streamline the IP lifecycle and save significant time, but when paired with sophisticated risk analysis and strategic decision-making led by human experts, the opportunities become far greater. Working with trusted strategic partners can help broaden the perspective of in-house teams and help provide more of an outward-facing perspective.

From Cost Center to Command Center: The Future of Litigation is Being Built In-House (Featuring Renee Meisel)

We're proud to share that Renee Meisel, our Chief Executive Officer, is one of the authors of "From Cost Center to Command Center: The Future of Litigation is Being Built In-House," recently published by Stanford Law.

"Litigation is not disappearing, but the people who lead, draft, and direct it are changing quickly." [Read the article here.](#)
