Applied AI in Legal: Ethics, Risk, and Governance around AI in the Practice of Law

What if you could hear directly from judges, law firm leaders, and in-house counsel about their approach to AI?

This report moves beyond theory, offering real-world insights from across the legal field -- revealing how professionals in different roles are applying AI today.

Explore where ethical gaps commonly arise, why governance needs to be tailored to specific use cases, and what meaningful human oversight truly involves, through the perspectives of leading experts.

Brand Protection as Strategy: End-to-End Frameworks Built to Disrupt

Today's counterfeiters are highly sophisticated, operating across digital and physical channels and threatening brands and public health.

To stay ahead, companies are making their brand protection efforts more strategic and intelligence-led—integrating key functions into one workflow for cost-effective results.

Legal Loopholes and Language Models: Featuring Beverly Rich & Renee Meisel

Many legal teams are aiming too low with AI—treating it as a simple one-to-one task replacement instead of a true transformation opportunity.

Don't miss this eye-opening podcast episode featuring our **CEO, Renee Meisel** and **VP of AI & Product Innovation, Beverly Rich**. Led by Nick Schutt from Robots and Red Tape, they dive into the real-world realities of AI in the legal industry—what's working, what's not, and where the biggest opportunities lie.

Tune in to rethink what AI can really do for your legal team.
